

Brake Parts Cleaner

Airable's brake parts cleaner delivers exceptional cleaning performance while meeting environmental standards. Designed for professional and industrial use, it quickly removes grease, oils, brake dust, dirt, and brake fluid—helping ensure optimal braking system performance. The formula evaporates rapidly, leaving no residue.

THE TECHNOLOGY

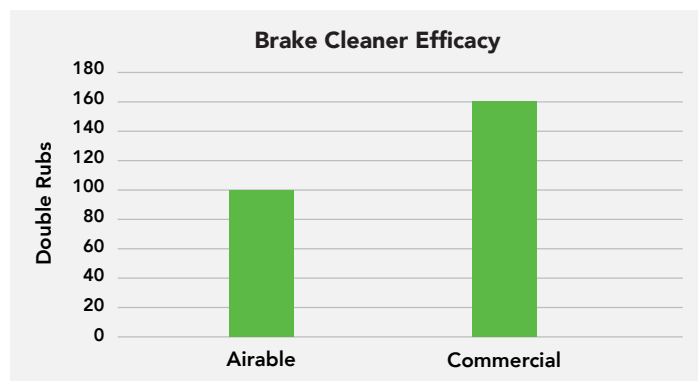

Our brake cleaner is formulated with renewable, biobased solvents that meet California's VOC regulations. This non-chlorinated cleaner uses fast-evaporating components—such as acetone and other high-vapor-pressure solvents—to afford quick drying with zero residue. The cleaner penetrates deeply and breaks down grease, oil, and brake dust more effectively, to ensure thorough cleaning.

HIGHLIGHTS

- Lifts and removes heavy contaminants fast
- Dries quickly
- Leaves parts residue-free
- Strong penetration for tough-to-clean areas
- Suitable for automotive and industrial applications

TECHNICAL DATA

- 90% biobased
- Non-chlorinated
- VOC-exempt
- Colorless, clear liquid
- 0.079 g/min evaporation rate

The number of double rubs required to remove vegetable oil that has been baked onto a steel panel. The Airable formulation requires fewer passes to come clean, which suggests better cleanability.
